High Priority Targets for the European Satellite Area

Part A of this list is made up of priority targets which have been selected by the Theatre Commanders Europe as the most important from a targeting point of view. This list does not include any targets heretofore covered in the course of earlier missions. The Ad Hoc Requirements Committee does not recommend coverage of this list except incident to penetration of the Western USSR. These objectives, while of high priority, are not considered to compare in importance to most of the targets on the Western USSR list. Therefore, Part B of this list includes targets which have previously been covered but on which repeat coverage is required and lower priority targets which have not yet been covered. The Ad Hoc Requirements Committee recommends that Operations be guided in its mission planning by Part A in the first instance and Part B insofar as feasible.
